

TANAKA BLESSING MAMVUNDWI

ELECTRICAL & ELECTRONIC ENGINEERING GRADUATE

Harare, Zimbabwe | +263774938930 / +263718051956 | tmamvundwi6@gmail.com |
tanaka.mamvundwi@students.uz.ac.zw | <https://www.linkedin.com/in/tanakamamvundwi>

PROFESSIONAL SUMMARY

A driven graduate electrical and electronic engineer with an understanding of industry-standard design, modeling, simulation and implementation technologies. Seeking an entry-level position to contribute to a forward thinking engineering team. Passionate about advancing sustainable technologies and eager to engage in innovative projects that drive progress.

PERSONAL DETAILS

- **D.O.B** : 04 March 2001
- **Marital Status** : Single
- **Driver's License** : Clean Class 4

SKILLS

- AutoCAD Electrical
- Electrical Circuit Design
- Automation
- MATLAB
- Electronics
- Programming (Python)
- Microsoft Office
- Embedded Systems
- PCB Design

WORK EXPERIENCE

Dinson Iron & Steel Company

March 2026 – Present

Assistant Electrician

Duties and Responsibilities include:

- Coordinated with electricians to perform testing, installations and maintenance of electrical equipment, wiring and systems in the steel processing plant.
- Performed inspections to identify potential safety hazards, diagnose critical issues and conduct repairs in accordance with safety standards.
- Collaborated with electricians to troubleshoot electrical issues.
- Assisted electricians in installing and repairing industrial motors, transformers, automation and control systems.

Emgol Foods Pvt. Ltd

October 2024 – February 2026

Packer & Sales Representative

Duties and Responsibilities include:

- Efficiently handled packaging and labelling of products for sale, ensuring compliance with specifications.
- Operated machinery to pack products efficiently.
- Inspected products and packaging for details ensuring compliance with standards.
- Executed manual tasks including lifting, packing, labelling, and sorting with focus on efficiency.
- Collaborated with team members to maintain a clean and safe working environment.

UNIVERSITY PROJECT

Solar Powered Wireless Electric Vehicle Charging System

November 2023 – June 2024

- Designed solar charge controller, variable high frequency DC/ AC inverter and voltage sensor systems.
- Designed magnetic resonance copper coil system for wireless power transmission.
- Designed systems using Proteus, Diptrace, MATLAB and Simulink.
- Programmed AVR microcontrollers which controlled the DC/ AC inverter and output voltage sensor to battery.
- Designed, fabricated and soldered printed circuit boards of the systems.
- Presented project to University of Zimbabwe Lecturers who approved the project.

EDUCATION

- **BSc Honors Degree in Electrical and Electronic Engineering (First Class)** September 2024
UNIVERSITY OF ZIMBABWE—Harare, Zimbabwe (2020-2024)
- **3 Advanced Level Passes in Mathematics, Physics and Chemistry (3 A's)** November 2019
ZRP HIGH SCHOOL—Harare, Zimbabwe (2018-2019)
- **13 Ordinary Level Passes Including Mathematics, Science & English** November 2017
ZRP HIGH SCHOOL—Harare, Zimbabwe (2014-2017)

ACHIEVEMENTS

- Graduate University of Zimbabwe Book Prize

LANGUAGES

- English
- Shona
