

About me

An electronic support engineer professional with strong problem-solving skills and hands-on experience in diagnosing and resolving network, hardware, and software issues. Skilled in supporting ICT systems, routers, and wireless infrastructure while ensuring reliable connectivity and minimal downtime. Committed to delivering efficient, customer-focused support and maintaining high service standards.

Skills

Technical

- Network Troubleshooting (TCP/IP, Connectivity Issues)
- Routers & Wireless Systems Support (WiFi, APs, Hotspot Systems)
- Hardware & Software Support
- System Installation, Configuration & Maintenance
- Windows Environment Support
- Technical Documentation & Reporting
- Ticketing Systems & Incident Logging
- Customer Support & Communication

Software tools and technologies

- JavaScript, HTML, CSS
- Python
- Java
- Postgres SQL
- Microsoft office

Certificates

- Diploma In Software Engineering, Telone Center For Learning (2025)
- Class 2 drivers licence

Professional experience

Telone Pvt : Intern

01/2025 -12/2025

- Provided day-to-day technical support for enterprise applications, responding to incidents and service requests to ensure system availability and user satisfaction.
- Supported production systems including the TelOne SMS Gateway, ensuring stable operations, system monitoring, and timely resolution of technical faults.
- Assisted in the support and maintenance of STMS (Zimbabwe Republic Police) systems, providing application-level support, data validation, and operational troubleshooting.
- Delivered technical support for InsureMe, assisting users with system functionality, configuration issues, and backend-related incidents.
- Supported Smart WiFi Solutions at Robert Mugabe International Airport, assisting with system configuration, connectivity troubleshooting, and ongoing operational support in a high-availability environment.
- Documented incidents, resolutions, and procedures, contributing to knowledge base and troubleshooting guides.
- Worked closely with development, infrastructure, and operations teams to resolve escalated technical issues.
- Provided clear, user-friendly communication to non-technical users, ensuring effective issue resolution and guidance

Personal Project

2026

- Designed and implemented a community hotspot system, configuring routers and wireless access points to provide controlled internet access.
- Manage user access, bandwidth allocation, and connectivity troubleshooting to ensure stable and efficient network performance.
