

STHABILE MKWAKWAMI

27 Horseferry Rd,
Meyrick Park, Mabelreign
+263 77 955 8860
sthabilemkwakwami@gmail.com

PROFILE

Electronic Engineering graduate with experience supporting IT systems, embedded/PLC-based energy automation, and commissioning-related field work. Strong academic foundation in instrumentation, control systems, and embedded programming, with proven strengths in fault finding, troubleshooting, technical documentation, and coordinating technical repairs. Seeking the Electronic Engineer role to design, develop, commission, and maintain safe and reliable electronic/control systems, and to continuously improve performance through effective engineering practice and compliance-focused troubleshooting.

EDUCATION

National University of Science and Technology (NUST)

BEng (Hons) Degree in Electronic Engineering (2.1)

Thesis: Wireless - Digital Stethoscope

Bulawayo, Zimbabwe

Aug 2018 – Jun 2023

St Antony's High School

Advanced Level: Mathematics, Physics, Chemistry

Masvingo, Zimbabwe

Jan 2012 – Nov 2017

SKILLS

- **Electronic System Design & Development:** Designing and analyzing electronic circuits; applying simulation and testing practices.
 - **Control Systems & Automation:** Understanding of control technologies including PID controllers; PLC-based automation exposure.
 - **Embedded Systems / Programming:** Proficient in C and Python for microcontroller/embedded applications; firmware-level problem solving.
 - **PLC Logic & Pre-Commissioning Testing:** Experience with PLC logic programming and assisting with energy system testing/verification.
 - **Troubleshooting & Maintenance:** Diagnosing and resolving hardware and systems faults using systematic troubleshooting.
 - **Installation & Commissioning Support:** Supporting configuration, setup, and readiness checks for technical systems (energy/SCADA environments).
 - **Technical Documentation:** Writing clear technical documentation, interpreting schematics/manuals, and maintaining engineering records.
 - **Power/Energy Systems Exposure:** Knowledge of power generation, transmission, distribution; exposure to solar power plants and electrical distribution systems.
 - **Testing & Compliance Mindset:** Emphasis on safe, reliable operation through verification, checks, and disciplined troubleshooting.
-

WORK EXPERIENCE

Zesa National Training Centre

Harare, Zimbabwe

Electrical Engineering

Aug 2025 - Present

- Full hands-on exposure across assigned tasks under supervision, covering electrical installation, maintenance, inspection, and operational support.
- Developed strong competence in electrical fault finding, troubleshooting, and isolation procedures to restore safe and reliable service.
- Practiced installation, maintenance, and operational support for electrical systems, following safety procedures and work instructions.
- Applied structured testing/verification methods using standard tools and test instruments.
- Built competence in technical documentation, including maintenance records, task reporting, and adherence to procedures and checklists.
- Strengthened teamwork and communication by working in multidisciplinary electrical operations/maintenance routines and reporting outcomes clearly.

Tuffy Events and Lodges

Chiredzi, Zimbabwe

Information Technology Manager

Dec 2023 – July 2025

- Managed and upgraded office IT systems, ensuring stable operation and uninterrupted service.
- Coordinated vendor repairs and maintained a structured IT asset inventory and maintenance tracking.
- Installed and updated software, managed network setups, and ensured data protection practices.
- Performed hardware troubleshooting and repairs for office equipment, applying structured fault-finding methods.
- Supported technical onboarding and user assistance through clear documentation and practical guidance.

GridPro Energy (Pvt) Ltd

Gwanda, Zimbabwe

Electronics Engineering Intern

Nov 2022 – Aug 2023

- Installed and configured SCADA-monitored solar power plants and electrical distribution systems.
- Assisted with PLC logic programming and performed pre-commissioning tests for energy system readiness.
- Conducted research and produced structured technical documentation on photovoltaic (PV) systems.
- Supported troubleshooting and system verification activities to ensure safe, efficient, and reliable performance.

Ministry of National Housing and Social Amenities

Harare, Zimbabwe

Information Technology Intern

Oct 2021 – Aug 2022

- Provided technical support, installed software, and maintained network infrastructure.
 - Supported data backup/recovery, cybersecurity practices, and database management using MySQL.
 - Assisted with IT project coordination and conducted ITIL-related staff trainings.
 - Designed, implemented, and maintained enterprise network infrastructure.
 - Configured routers, switches, firewalls, supported MPLS networks, and documented configurations.
 - Resolved technical issues through structured troubleshooting and accurate system record-keeping.
-

CERTIFICATIONS

- Clean Class 4 Driver's License
 - HEXCO Computer Operations and Packages (12/2015)
-

PROFESSIONAL AFFILIATIONS

- Member, Zimbabwe Institution of Engineers (ZIE)
-
