HARD SKILLS

- **Programming Languages:**
C++, C#, VB.Net, PHP, JavaScript and Python for scripting, building functional and efficient applications.
- **Web Development:**
HTML, CSS, JavaScript, responsive layouts, and API integration for modern, interactive web interfaces.
- **Backend Development:**
Experience with PHP, MySQL, and server-side logic to support dynamic and data-driven systems.
- **Database Administration:**
MySQL management, SQL querying, database design, optimisation, and routine backup/recovery tasks.
- **Graphics Design:**
Proficient in Adobe Illustrator, Photoshop, and related tools. Experienced in designing logos, flyers, posters, CV layouts, and various digital graphics.

PROFILE SUMMARY

Versatile IT Specialist with 3+ years of expertise across web development, systems administration, and graphic design. Skilled in building functional applications using PHP, JavaScript, and Python, with a deep understanding of database management and UI/UX principles. Transitioning from a background in full-stack development and IT support into Cybersecurity, backed by a Google Professional Certificate and hands-on experience in vulnerability assessment and access control. Proven track record of enhancing operational efficiency, including improving network uptime to 99.7% during a year-long tenure as an IT Technician. Committed to defending digital assets through ethical hacking and secure system design.

I am expanding my expertise in secure systems design, vulnerability assessment, and network defense. I bring strong analytical abilities, creativity, and a commitment to continuous learning.

EDUCATION HISTORY

2023-2025 National Diploma in Information Technology **Bulawayo Polytechnic**

"Advanced training in networking, cybersecurity, software development, and systems administration, supported by practical projects that strengthened problem-solving and technical implementation skills."

2021-2022 National Certificate in Information Technology **Bulawayo Polytechnic**

"Completed a certificate in Information Technology with 2 distinctions; 5 credits & 2 passes where i gained a solid foundation in core IT principles, practical computing skills, and introductory cybersecurity concepts gained through hands-on coursework and technical training."

2018-2019 ICDL Profile Certificate **Speciss College, Bulawayo**

"Completed a Computer Science course pertaining IT Security, DB Management, Online Essentials, Computer Essentials. etc."

• **Cybersecurity:**

Foundational skills Linux OS, Terminal, Bash, vulnerability assessments, secure coding practices, and access control.

• **Networking Fundamentals:**

Understanding of LAN environments, TCP/IP protocols, routers, switches, and general network troubleshooting.

• **Software Development:**

Knowledge of OOP principles, debugging, and version control using Git

SOFT SKILLS

- Problem-Solving
- Communication
- Teamwork
- Adaptability
- Attention to detail
- Learning Agility
- Creativity
- Time Management

INTERESTS

- Reading and studying the Bible
- Exploring new technologies and cybersecurity trends
- Gaming (strategy and simulation games)
- Creative design and graphics
- Writing and blogging about faith and technology
- Problem-solving challenges (coding exercises, puzzles)
- Learning new skills through online courses

WORK EXPERIENCE

Jan 2024 - Dec 2024

Intellego Investment Consultancy, MMC Capital
22 Arundel Road, Alexandra Park
Harare, Zimbabwe

IT Technician

- Designed graphics for digital and print media, flyers, layouts, and website visuals.
- Managed end-to-end website content and functionality, integrating secure backend logic to improve user experience.
- Provided technical support by troubleshooting hardware, software, and network issues.
- Installed, configured, and upgraded computer systems, software, and peripherals.
- Engineered and monitored network performance for a dual-firm environment, achieving a consistent **99.7%** uptime.
- Executed full-cycle hardware and software lifecycles, from initial installation and configuration to routine data recovery and backups.
- Spearheaded the implementation of firewalls, antivirus protocols, and granular access controls to safeguard sensitive investment data.
- Created and managed user accounts, passwords, and permissions.
- Delivered user training and support for system usage and troubleshooting.
- Conducted internal Cybersecurity training workshops, elevating the digital literacy and security awareness of the staff.
