PROFESSIONAL SUMMARY

Motivated **IT & Electronic Security Support Engineer** candidate with a **BEng in Telecommunications Engineering (2.1)** and **one year of hands-on IT support experience**. Strong foundation in **networking, hardware, Microsoft 365, and electronics** (Digital Signal Processing, Embedded Systems). Proven quick learner with excellent troubleshooting and client communication skills. Holds valid driver's license and willing to travel.

TECHNICAL SKILLS

- IT Services : Windows 10/11, Microsoft 365 (user admin, mailbox config), endpoint protection, backup procedures.
- Networking: Data Communication, TCP/IP, LAN/Wi-Fi troubleshooting, network diagnostics.
- Operating Systems: Windows 10/11, Windows Server Basics, Linux CLI.
- System Administration: Active Directory, user management, backup procedures, system monitoring.
- Networking: TCP/IP, LAN/Wi-Fi troubleshooting, network diagnostics.
- System Security: Cryptology fundamentals, access control, user permissions, backup procedures.
- Hardware & Systems: Installation, configuration, maintenance of computers and peripherals.
- Documentation: Technical documentation, user guides, service logs, asset tracking.
- Testing & QA: User acceptance testing, bug reporting, system validation.

PROFESSIONAL AND INTERPERSONAL SKILLS

- Strong analytical and problem-solving abilities with a methodical approach to troubleshooting
- Excellent verbal and written communication; able to explain technical issues clearly to non-technical users
- Customer-service oriented with a patient and supportive demeanour
- Highly adaptable and quick to learn new tools and technologies in fast-paced environments
- Effective team collaborator with experience coordinating with internal and external IT teams

WORK EXPERIENCE

March 2024 - March 2025 | I.T Intern

Employment type: Industrial Attachment

Employer: Chitungwiza Municipality

Responsibilities included:

- System Support & Maintenance: Installed, configured, and maintained computer systems, operating systems, and application software for over 100 staff members.
- Troubleshooting & Debugging: Diagnosed and resolved hardware, software, and network issues; documented system errors and communicated resolutions.
- User Support & Training: Provided frontline technical support via phone, email, and in-person; trained staff on new systems and created user guides.
- Documentation: Maintained detailed service logs, technical documentation, and user manuals for system changes and common issues.
- System Testing: Participated in user acceptance testing for network upgrades and system changes; validated functionality before deployment.
- Process Improvement: Developed Python scripts to automate repetitive tasks, improving operational efficiency.
- Database Exposure: Used SQL for data retrieval and analysis in support activities; familiar with database concepts.
- Security & Backups: Assisted in backup procedures, disaster recovery testing, and system security monitoring.

PROJECTS

1. AI-Driven Traffic Management System | Final Year Dissertation | 2025

- Role: Sole Developer and Researcher
- Objective: Design an intelligent system using AI to optimize urban traffic flow
- AI/ML Implementation:
- Implemented three reinforcement learning algorithms: PPO, A2C, and DQN using StableBaselines3
- Designed custom reward functions to balance traffic efficiency, emergency response, and environmental impact
- Trained models over 500,000 timesteps with systematic hyperparameter optimization
- Created custom Gym environment with 10-dimensional observation space and 4 discrete actions

2. Prototype Smart Attendance System:

- Role: Product Owner, Developer, Tester
- Developed and deployed a cloud-hosted web application using Python, OpenCV, and JavaScript
- Defined requirements, created user stories, and established acceptance criteria
- Coordinated user testing, gathered feedback, and implemented improvements
- Monitored system performance and user adoption post-launch
- Created user documentation and trained end users
- <https://smart-attendance-system-python.onrender.com/login>

3. Chatbot for Survey System :

- Role: Product Designer, Implementer
- Designed a digital workflow to replace manual data collection using Typebot
- Gathered requirements from stakeholders and translated into functional specifications
- Conducted user acceptance testing and refined based on feedback
- Trained users and created supporting documentation
- Monitored usage and identified opportunities for further optimisation
- <https://typebot.co/vital-statistics-survey-9svzf3m>

EDUCATION AND QUALIFICATIONS

- BEng (Hons) Degree in Telecommunications Engineering (Midlands State University) – Upper Second Class (2.1) (2022-2025) .
- Advanced Level : Seke 5 High School, Chitungwiza (ZIMSEC 2021)
- Ordinary Level : B & P Study Centre, Chitungwiza (ZIMSEC 2019)
