PROFESSIONAL PROFILE

Results-driven professional with hands-on experience in IT support, user access management, systems administration and standard cybersecurity practices such as the McCumber Cube Framework. Basic understanding of data analysis and visualisation using Python in Jupyter environments, extracting and transforming data from PostgreSQL databases, and presenting actionable insights through tools such as Pandas, Matplotlib, Seaborn, Plotly. Proficient in the Microsoft Windows environment and Office Suite, TCP/IP, DNS, DHCP, and Active Directory fundamentals. Demonstrates technical knowledge of Java (Spring Boot), SQL (including OLAP operations), MongoDB, and REST API development using VS Code and Maven, with version control via Git & GitHub. Proven record of stabilising business-critical systems and delivering measurable operational and financial efficiencies in the public sector in compliance with the Cyber and Data Protection Act (Chapter 12:07) and the COBIT Framework. Adept at translating technical solutions into business value.

EDUCATION

Master of Commerce Degree in Information Systems Management

Midlands State University

Expected July 2027

Level 1:1

Bachelor of Commerce Honours Degree in Information Systems

Midlands State University

WORK EXPERIENCE

Inter (Information Technology Officer)
Bikita Rural District Council

August 2023 - July 2024

- Managed approximately 20 - 25 system user accounts, implementing role-based access controls, password policies, and basic security procedures resulting in zero recorded data breaches or unauthorised access incidents.
- Administered and maintained approximately 30 - 35 IT assets, achieving 100% asset accountability, reducing asset loss probability from approximately 15% to less than 1%, and extending equipment lifespan by around 20% through preventative maintenance.
- Introduced IT service management and governance practices (incident logging, prioritisation, and escalation), reducing average response time from approximately 48 hours to under 12 hours and significantly improving end-user satisfaction.

- Delivered end-to-end IT support services including installation, configuration, and maintenance of Windows-based systems, improving system reliability and user productivity for multiple clients.
- Administered user access controls and basic directory services, ensuring secure system usage aligned with data protection principles.
- Designed and developed web-based applications using Java (Spring Boot) and RESTful APIs, supporting small business operations and digital service delivery.
- Built and managed relational and non-relational databases (PostgreSQL, MongoDB), including data modelling, querying, and optimization.
- Performed data extraction, transformation, and analysis using Python (Pandas, Matplotlib, Seaborn, Plotly) within Jupyter environments to generate actionable insights for clients.
- Implemented data visualization dashboards and reports, enabling clients to make informed operational and financial decisions.
- Configured and troubleshooted network environments (TCP/IP, DNS, DHCP) to ensure stable connectivity and system performance.
- Integrated and supported accounting and business systems (Sage Pastel, BELINA), including transaction workflows, reporting, and system troubleshooting.
- Advised clients on cloud-based and SaaS solutions, improving scalability and reducing infrastructure costs.
- Maintained version control and collaborative development workflows using Git and GitHub.
- Applied best practices in data security and compliance, aligning solutions with Zimbabwe's Cyber and Data Protection Act (Chapter 12:07).

REGISTRATION & PROFESSIONAL CERTIFICATIONS

Cisco Introduction to Cybersecurity

Cisco Networking Academy

Industrial Training Department - Electrical Trade 2025

Officially registered and cleared by the Ministry of Higher and Tertiary Education - Industrial Training Department (Reference: MT25/802). Confirmed to meet the minimum entry qualifications for the Electrical industry under the Manpower Planning and Development Act (Chapter 28:02).

KEY COMPETENCIES

- User Access Management & Identity Support
- Client Engagement & Relationship Management
- Role-Based Access Control (RBAC)
- Proposal Writing & Presentations
- IT Support & Service Desk Operations
- Incident Logging & Resolution
- Digital Marketing (LinkedIn, WhatsApp, Facebook Content)
- System Monitoring & Basic Security Awareness
- Lead Generation & Prospecting
- Sales Pipeline & Funnel Awareness
- Data Protection & Compliance
- CRM Systems & Data Tracking (Academic/Practical Exposure)
- Documentation & Audit-Ready Reporting
- Hardware & Software Troubleshooting
- Communication & Negotiation Skills
- SOP Adherence & Process Support
- Market Research & Customer Insights
- Version Control (Git & GitHub)
- Data Analysis (Python, SQL)
- Problem Solving & Business Analysis

REFEREES

The following individuals may be contacted:

Mr E. Kudzinyadza

Regional Registrar - Industrial Training Department
Ministry of Higher and Tertiary Education, Number 911 Fourth Avenue, Mutare
Tel: 69361, 62995, 68954 | FAX: 69360
