PERSONAL DETAILS

License Category: Class 4 | Nationality: Zimbabwean | Languages: English and Shona

PROFESSIONAL SUMMARY

Motivated and technically driven IT graduate with a Bachelor of Commerce (Honours) in Data Science and Informatics from Midlands State University. Hands-on experience in software development, IT support, system troubleshooting, and infrastructure-related technologies gained during practical attachment. Skilled in Windows administration, Office 365, networking fundamentals, SQL databases, and application support. Strong analytical and problem-solving abilities with exposure to web applications, system maintenance, and operational support. Eager to grow in both IT Services and Electronic Security Systems through practical field experience, continuous learning, and contribution to reliable technology solutions.

TECHNICAL SKILLS

- Programming & Development: Java (Spring Boot, REST APIs), Python, JavaScript
- Databases: MySQL, SQL Querying, Data Validation, Database Optimisation
- IT Support & Infrastructure: Windows 10/11 Administration, Office 365, Active Directory, User Support, System Troubleshooting, System Health Checks
- Networking: TCP/IP, DNS, DHCP, Network Configuration Fundamentals
- Tools & Platforms: Git, IntelliJ IDEA, Visual Studio Code, MySQL Workbench, Jupyter Notebook
- Monitoring & Operations: Logging, Error Handling, System Health Checks, Data Integrity Controls
- Data & Reporting: Power BI, Tableau, Microsoft Excel (Pivot Tables, Dashboards)
- Soft Skills: Problem Solving, Communication, Team Collaboration, Adaptability, Technical Documentation

PROFESSIONAL EXPERIENCE

Sunway City Pvt

Software Developer Trainee (From January 2024 to February 2025)

- Maintained and supported the company's internal systems and public websites.
- Developed web applications using Java, Spring Boot, JavaScript, and MySQL.
- Used IntelliJ IDEA for coding, debugging, and testing features.
- Investigated and fixed application issues by tracing errors and validating end-to-end workflows.
- Wrote and optimised SQL queries to verify data integrity and resolve inconsistencies.
- Assisted in deploying updates and ensuring systems operated correctly after changes.
- Collaborated with senior developers to improve system stability, usability, and performance.
- Provided technical support to users by troubleshooting system and application-related issues and ensuring minimal downtime.
- Assisted with system configuration, testing, deployment, and operational maintenance activities.

PERSONAL PROJECTS

Vehicle Requisition System – Java Spring Boot & MySQL

- Designed and developed a web-based enterprise system using Java Spring Boot and MySQL.
- Implemented RESTful APIs, authentication, and role-based access control.
- Validated end-to-end workflows to ensure correct system behaviour.
- Applied defensive coding, input validation, and logging for production stability.
- Wrote SQL queries for monitoring transactions and correcting data inconsistencies.
- Improved reliability through error handling and controlled updates.

ACADEMIC & PRACTICAL PROJECTS

Decision Support System for Sales Optimisation 4th year project (Distinction)

- Built a data-driven system for analysing transaction behaviour using Python and SQL.
- Automated data validation and anomaly detection.
- Created dashboards for monitoring performance and usability issues.
- Implemented scripts for controlled data fixes under audit-friendly processes.
- Supported system users by investigating defects and improving operational flows.

ACADEMIC QUALIFICATIONS

(Midlands State University)

- Bachelor of Commerce (Honours) in Data Science and Informatics (2022-2025)
- Relevant Coursework: Object-Oriented Programming (Java), Web Application Development, Database Management Systems (SQL & MySQL), Software Engineering Principles

(THORNHILL HIGH SCHOOL)

- Advanced Level Certificate (2020-2021)
- Ordinary Level Certificates (2016-2019)

CERTIFICATIONS & TRAINING

AWS Certified Developer – Associate (DVA-C02) — In Progress

Focus Areas: AWS Core Services, Application Deployment, Monitoring, Security, CI/CD, and Troubleshooting on AWS.
