PROFILE

IT Support and Computing & Information Systems graduate with hands-on experience in troubleshooting hardware, software and network connectivity issues within live IT environments. Skilled in Windows systems, Wi-Fi troubleshooting, router configuration and technical support. Familiar with Microsoft Office environments, networking fundamentals and system maintenance. Strong analytical, problem-solving and communication skills with the ability to work independently and collaboratively within team environments.

TECHNICAL SKILLS

- IT Support & Systems
- Technical Support
- First-Line IT Support
- Hardware Troubleshooting
- Software Troubleshooting
- Windows 10/11
- Microsoft Office
- Microsoft 365 Fundamentals
- Printer Installation & Troubleshooting
- Technical Documentation
- Networking
- TCP/IP
- DNS
- DHCP
- Router Configuration
- Wi-Fi Troubleshooting
- Network Connectivity Support
- Basic Switch Configuration

Python
JavaScript
HTML/CSS
MySQL
Verbal & Written Communication
Remote & Onsite Support

PROFESSIONAL EXPERIENCE

Data, Systems & Operations Intern

Lonestar Systems | Mutoko, Zimbabwe

August 2025 - April 2026

- * Provided technical support for hardware, software and Wi-Fi connectivity issues in a live IT environment.
- * Diagnosed and resolved router and network connectivity problems, improving system stability and minimizing downtime.
- * Assisted users with troubleshooting technical issues related to systems and connectivity.
- * Supported website front-end updates using HTML, CSS and JavaScript to improve usability and interface responsiveness.
- * Performed routine system checks and preventive maintenance on IT equipment.
- * Collaborated with team members to complete technical tasks and maintain operational efficiency.
- * Documented technical issues, maintenance activities and resolutions accurately.
- * Demonstrated strong communication skills while supporting users and working within team environments.

PROJECTS

Business Process Automation System

- * Developed an inventory management system using Python and MySQL for real-time stock tracking and report generation.
- * Configured database connectivity and performed troubleshooting during deployment and testing.
- * Maintained system performance through debugging and issue resolution.

Web Application Development

- * Built a responsive student information portal using HTML, CSS & Javascript, featuring a secure authentication, dynamic user dashboards and structured

data presentation. Focused on usability, clean UI flow and functional access control.

E-Commerce Platform Prototype

- * Developed an interactive e-commerce prototype featuring product catalog browsing and cart management functionality.
- * Applied front-end development principles to improve user interaction and navigation flow.
- * Demonstrated analytical thinking and problem-solving during system design and implementation.

EDUCATION

Higher Diploma in Computing and Information Systems, ABMA

Speciss College, Chitepo Campus

- * Completed a comprehensive curriculum covering Software Development, Database Systems, Web Technologies, System Analysis and Design, IT Project Management and Enterprise Architecture.
- * Gained a strong foundation in both theoretical and applied aspects of Computing and Information Systems
- * Collaborated in team-based assignments simulating workplace environment, strengthening communication and project coordination skills.

PROFESSIONAL ATTRIBUTES

- * Strong problem-solving and analytical ability
- * Excellent written and verbal communication
- * Able to work independently and within teams
- * Organized, dependable and solution-oriented
- * Quick learner with strong adaptability
- * Professional and accountable in work environments
