

SUMMARY

Highly motivated and dedicated ICT technician with over a year of practical experience gained during an industrial attachment at the Zimbabwe Broadcasting Corporation. Skilled in computer hardware and software maintenance, network configuration, troubleshooting, and providing technical support to end users. Possesses strong analytical and problem-solving abilities with a commitment to ensuring efficient and reliable ICT operations. A proactive team player who adapts well to new technologies and thrives in fast-paced, dynamic environments.

EDUCATION

Chitungo High School

Ordinary and Advanced Level
2015 – 2018

Bindura University of Science Education

Bachelor of Science (Honours) Degree in Computer Science
2021 – 2025

SKILLS

- IT Support & Troubleshooting
- Network Administration (Basic TCP/IP, Routing, Switching)
- System Installation & Maintenance
- Cybersecurity Fundamentals
- Database Management (MySQL, SQLite)
- Programming: Java, Python, PHP
- Web & Mobile Application Development
- Technical Documentation
- Teamwork & Communication

PROFESSIONAL EXPERIENCE

ICT Technician Intern

Zimbabwe Broadcasting Corporation (ZBC)
January 2024 – December 2024

- Installed, configured, and maintained computer hardware, software, and network systems
- Provided first-line technical support, resolving hardware and software issues efficiently
- Assisted in monitoring network performance and implementing basic cybersecurity measures
- Supported setup and maintenance of printers, routers, and peripheral devices
- Maintained accurate IT asset inventory and equipment tracking
- Participated in data backup and recovery processes to ensure system reliability
- Documented troubleshooting procedures and user guides
- Assisted in system upgrades and testing of new software solutions

Projects

AI-Based Risk Prediction & Dietary Guidance System

- Developed a machine learning model using Random Forest for predicting pregnancy risks
- Integrated rule-based system for personalized dietary recommendations
- Performed data preprocessing, training, and system integration

AI-Based Terrain Habitability Prediction System

- Built a model to assess terrain suitability across Zimbabwe
- Conducted data collection, preprocessing, and predictive analysis
- Implemented GIS-based visualization for results
