

TANAKA M. NYAMA

GRADUATE IT & ELECTRONIC SECURITY ENGINEER

Harare, Zimbabwe • +263 786 221 203 • +263 718 354 616 • tanakanyama002@gmail.com

PROFESSIONAL PROFILE

Recent IT graduate combining a BSc in Cloud Computing & Internet of Things (IoT) with practical experience managing endpoint infrastructure. Uniquely positioned for cross-functional IT and Electronic Security roles: my background in IoT directly translates to understanding how physical security devices (IP CCTV, access control) communicate across IT networks. I have hands-on experience running first-line support for over 100 users, handling machine setups, basic network troubleshooting, and managing system backups. Ready to transition from isolated IT administration to hands-on, multi-disciplinary field engineering.

CORE COMPETENCIES & TECHNICAL FOUNDATION

- IoT Infrastructure (IP CCTV & Network Sensors)
- Basic Microsoft 365 Administration
- LAN/WAN Basics & Endpoint Security
- First-Line IT Support & Machine Setup
- Hardware Diagnostics & Troubleshooting
- Oracle Certified SQL & Data Backup Management

EDUCATION & CERTIFICATIONS

BSc (Hons) Cloud Computing & Internet of Things

2021 – 2025

University of Zimbabwe

Core coursework included integrating physical devices onto IT networks, providing the structural knowledge required to commission and secure IP-based electronic security systems.

Cisco Certified Network Associate (CCNA)

In Progress

Currently studying to deepen practical routing, switching, and network diagnostic skills.

Oracle Database SQL Certification

Completed

PROFESSIONAL EXPERIENCE

Systems & IT Support Administrator

Jan 2024 – Mar 2025

SPAR Market Square

- IT Infrastructure Support:** Acted as the primary on-site IT contact for over 100 endpoints. Set up and configured desktop/laptop machines, installed software, and ensured reliable connectivity across the branch network.
- Endpoint Administration:** Assisted with day-to-day user administration, routine endpoint backups, and enforcing basic IT security protocols to protect commercial data.
- Fault Resolution:** Responded to hardware and software faults, executed basic network troubleshooting, and escalated complex server/network issues to external senior consultants.

Field Operations Representative

Mar 2025 – Apr 2026

Varun Beverages (Pepsi)

- **Field Operations:** Worked in a high-volume, fast-paced commercial field environment. Built a strong work ethic, resilience under pressure, and the ability to solve logistical problems quickly outside of an office environment.

IT Intern (Network Operations)

Jun 2023 – Dec 2023

Credible Ads

- **Network Stability:** Assisted the technical team in monitoring internal network traffic and executing routine hardware maintenance tasks.
