

# KINGSTONE LEVY CHANDAENGERWA

## Software Engineering student

Belvedere, Harare | +263 786 206 633 | [kinglevchanda@gmail.com](mailto:kinglevchanda@gmail.com) | [github.com/kings-09](https://github.com/kings-09) | [unicrib11.netlify.app](https://unicrib11.netlify.app)

### PROFESSIONAL SUMMARY

Motivated Software Engineering student at the Harare Institute of Technology with proven ability to design, build, and deploy production-grade web applications. Creator of Unicrib, a live student accommodation platform actively serving university students across Harare, demonstrating end-to-end product ownership from architecture to deployment. Sole developer for GeoFence Tracker, a mobile app that tracks your location. Seeking a 2026 Software Engineering internship to apply full-stack skills within a collaborative, impact-driven engineering team.

### KEY SKILLS

**Programming Languages:** Java, Python, C#, JavaScript

**Frameworks & Libraries:** Spring Boot, React, HTML5 / CSS3

**Databases & APIs:** MySQL, REST API design, SQL

**Tools & Platforms:** Git, GitHub, IntelliJ IDEA, Android Studio, VS Code, Postman, Netlify, Supabase

**Soft Skills:** Problem-Solving, Team Collaboration, Agile/Scrum, Adaptability, Quick Learner

### PROJECTS & EXPERIENCE

#### Unicrib — Student Accommodation Platform

2025 – Present

[unicrib11.netlify.app](https://unicrib11.netlify.app) | [github.com/kings-09](https://github.com/kings-09)

- Architected and deployed a full-stack web platform connecting university students with verified landlords, eliminating fraudulent middlemen agents across Harare
- Built a RESTful backend API with Supabase and designed a relational database schema with landlord verification and listing management logic
- Developed a dynamic, responsive front-end with HTML5, CSS3, and JavaScript — currently serving real users in production with zero downtime
- Managed full CI/CD deployment on Netlify; sole developer responsible for all architectural, design, and infrastructure decisions from MVP to launch

**Tech Stack:** VS Code · React js · Supabase · JavaScript · RESTful APIs · HTML/CSS · Netlify

#### GeoFence Tracker — Mobile application that tracks your current location

April 2026

Harare Institute of Technology ·

- An Android Mobile Application that tracks your current location and allows you to add custom locations with an adjustable geo-radius
- Gives notifications if you are outside of a selected location and when you are within the selected location's radius making sure you don't lose track of where you're going
- Integrated Google Maps API for visuals and easy navigation, also gives you direction to the selected location and navigating you as you move until you reach the location

**Tech Stack:** Android Studio · Java/Kotlin · REST APIs

### EDUCATION

#### BTech (Hons) in Software Engineering

Aug 2024 – Present

Harare Institute of Technology (HIT) · Harare, Zimbabwe · Expected Graduation: 2028

- Relevant Modules: OOP, Web Development, Visual Programming, Mobile App Development
- Developed Unicrib, a live student startup, within HIT's entrepreneurship ecosystem

#### A-Level Certificate (3 Passes, 15points)

Jan 2022 – Dec 2023

Murewa High School · Murewa, Zimbabwe

#### O-Level Certificate (11 Passes)

Jan 2018 – Dec 2021

Howard High School · Mazowe, Zimbabwe

### CERTIFICATIONS & TRAINING

#### Java Spring Boot — Diploma

April 2026

Alison Online Learning

#### React JavaScript

November 2025

Alison Online Learning

#### Basics of Python

September 2024

UniAthena

## ADDITIONAL INFORMATION

---

**Languages:** English (Fluent), Shona (Native)

**Driver's Licence:** Valid Zimbabwe Class 4
