TO WHOM IT MAY CONCERN

RE: INDUSTRIAL ATTACHMENT 2026/2027 ACADEMIC YEAR

Attachment Letter for Munda Tinotenda

I do hereby confirm that Munda Tinotenda is a bona fide National University of Science and Technology student, studying towards a degree in Computer Science and due to undertake attachment from March 2026 up to 2027.

We would be grateful if you could assist the student with a position to undertake Industrial Attachment and we have no doubt that the student will perform to their best in assigned activities. We can, therefore, confidently recommend the student for the industrial attachment programme at your organisation. Your continued support is greatly appreciated.

Should you need further information on the matter please do not hesitate to contact the undersigned

Yours faithfully

MRS NAMATIRAI MARABADA

Industrial Attachment Coordinator

COMPUTER SCIENCE DEPARTMENT

Email: namatirai.marabada@nust.ac.zw

Summary

A motivated Computer Science student at NUST with a strong foundation in programming, databases ,in technical troubleshooting and providing support, with hands on skills in Java,React, html , css,node js , flutter and SQL. As an AWS Cloud Club Core member ,I am as well proactive problem solver eager to apply my technical abilities to contribute to IT support and software development projects as well as collaborating with others .

TECHNICAL SKILLS

- Java, HTML/CSS
- Git & GitHub, React ,Node , SQLite,MySQL ,Firebase
- Operating Systems : Linux, Windows
- OOP, Web Development, Debugging, Database Design
- Mobile Development : Flutter and Dart , React Native

PERSONAL ATTRIBUTES AND SOFT SKILLS

- Fast learner
- Analytical team oriented
- Strong Communication Skills
- passionate about software development
- Proactive and Self motivated

CERTIFICATIONS

Java Mastery: Beginner's Guide & Full Stack AI Projects Udemy (2025)
- Covered Java fundamentals, OOP, backend basics and full stack AI workflows.

-Coding Fundamentals I & II | Grasshopper (Google Area 120) | Dec 2021

EDUCATION

National University of Science & Technology (NUST)

Bachelor of Science Honours Degree in Computer Science

2024 – Current

Chibi High School, Zimbabwe (Advanced Level)

Maths, Physics, Computer Science

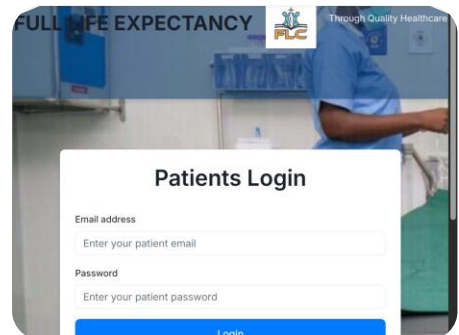

Class: **(13 points)**

PROJECTS

Flex Clinic Appointment System

GitHub: <https://github.com/Tinotenda209/flex.git>

- Built an online appointment booking system for a Bulawayo clinic.

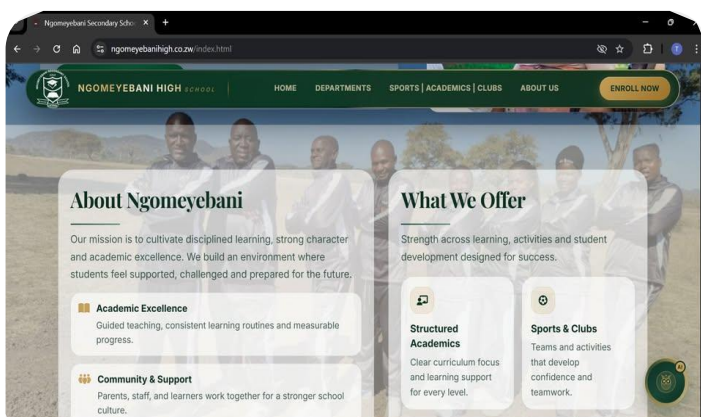

Ngomeyebani School Website

ngomeyebanihigh.co.zw

GitHub: <https://github.com/Tinotenda209/ngomeyebaniwebsite.git>

- Built a school website for Ngomeyebani High School.

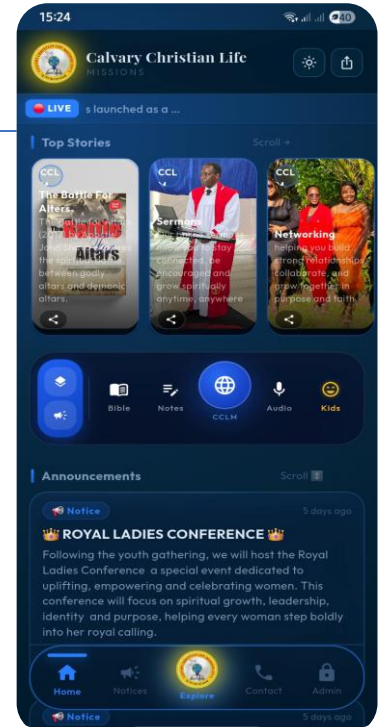

- Languages: JavaScript(**With an AI assistant**) , CSS , HTML.

Mobile application For Calvary Christian Life Missions church

- UI Developed a mobile application for Church for quick church updates and announcements intergraded with an in-app website .

- Languages: Flutter and Dart , Supabase, Firebase and local SQ database.

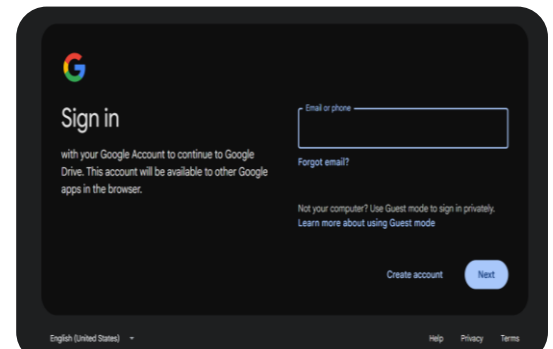

Google Registration Clone

GitHub: <https://github.com/Tinotenda209/Google-registration-clone.git>

- UI clone of Google registration page.

- Languages: JavaScript (64.3%), CSS (31.5%), React.jsx (4.2%).

Java Roadmap Practice Repository

GitHub: <https://github.com/Tinotenda209/Java-roadmap.git>

- Includes Java fundamentals, OOP, exceptions, files, threads, generics, packages and JAR execution.

EXAMINATION RESULTS

National University Of Science & Technology

Details

Surname: Munda

Name(s): Tinotenda

Gender: Male

National ID#: 67-119374Q22

Date Of Birth: 2004-09-9

Place Of Birth: Zvishavane

Programme: Bachelor of Science Honours Degree in Computer Science

Address and Contact Details

N02419679M

Ngomeyebani

Zvishavane

Zimbabwe

Telephone: :263711335609

Munda Tinotenda

Personal Statement

My fascination with technology began when I built my own mini website at the age of fourteen, but my desire to understand how software controls hardware drove me into coding. I am driven by the

methodical nature of problem solving and the ability to create tangible solutions from scratch. This passion has led me to focus on creating efficient, user centric software applications and has informed every step of my academic journey.

Through self study and academic projects, I have developed a strong foundation in HTML, CSS, React, JavaScript and Java, with additional experience in C++ from my high school computing course. Recently, I completed a personal project where I developed a flex clinic web application based in Bulawayo using html (fronted), node.js(backend) and SQLite(database) to solve a common problem faced by clinic. The web app allows patients, nurses and doctors to create and login to the system for appointments. This improved my debugging skills and deepened my understanding of objectoriented programming, RESTful APIs and version control with Git. I enjoy turning complex problems into clean, functional code and regularly contribute to open source repositories on GitHub to refine my skills.

Beyond the classroom, I have taken the initiative to extend my learning through extracurricular activities. I am an active member of my school's coding club and have participated in regional AWS Club and Heckathon, where I collaborated with peers to prototype mobile solutions under time pressure. These experiences have sharpened my analytical skills and reinforced my ability to work in team environments. Additionally, I have volunteered at a local community centre teaching basic programming workshops for younger students, reinforcing my own understanding while giving back.

Academically, I have pursued rigorous subjects such as Mathematics, Physics and Computing at A level, consistently achieving top grades. These disciplines have honed my logical reasoning and quantitative skills, which are essential for software engineering. Outside of formal education, I completed online courses in data structures and algorithms on platforms like Coursera and Udacity, ensuring I have a solid theoretical grounding to accompany my practical experience.

I am eager to deepen my knowledge of algorithms, artificial intelligence and software architecture through this program. My long term goal is to contribute to innovative software solutions in different technology sectors, developing applications that improve access to different industries, marketing, AI integration and Health sectors. By joining your company as an intern, I hope to build on my technical foundation, work with leading researchers and collaborate with likeminded mentors to prepare for a professional career as a software developer.

Thank you for considering my application.
