

Masimbaashe Musekiwa • 30 George Road, Hatfield, Harare, Zimbabwe • +263 714 769 476 / +263 783 742 796 • musekiwamasimbaashe@gmail.com

PROFESSIONAL SUMMARY

Results-driven Mechatronics graduate seeking to apply expertise in embedded systems, renewable energy, and agricultural technology to design and control intelligent systems.

EDUCATION AND CERTIFICATIONS

Qualification	Year	Institution
BEng Mechatronics Engineering (Upper Second Class, 2.1)	2018 - 2023	Chinhoyi. University of Technology
Solar PV Design and Installation	2025	Zimbabwe Energy Regulatory Authority (ZERA)
ICT Essentials For Teachers	2026	UNESCO (Online)
Advanced Level (Mathematics and Physics)	2017	Rufaro High School
8 Ordinary levels (including Maths, English and Science)	2015	Dewure High School

TECHNICAL SKILLS

Category	Skills
Programming Languages	C, Arduino, Python
Electrical	Transformers, Solar, Motor Control, Power Supplies, LV/HV Line Construction, Fault Analysis
Workshop Practises	Welding, CNC, Lathe Machine, Milling Machine
Softwares	AutoCAD, MATLAB, SolidWorks, Proteus, MS Office
Electronics	PCB Designing and Prototyping
Control systems	PID Control, Automation

KEY EXPERTISE

- ★ Feasibility Studies and Reporting
- ★ Adaptability & Continuous Learning
- ★ Team Collaboration & Leadership
- ★ Time Management
- ★ Excellent Communication
- ★ Analytical Problem-Solving

PROFESSIONAL EXPERIENCE

Solar Systems Engineer | Hurudza AI. (2025 – Present)

- Designed, installed, and commissioned 25+ solar PV systems (1kW-20kW) for farms, communities, and commercial clients, including solar borehole pumps and hybrid inverter systems
- Utilized Proteus Professional for system design and simulation, optimizing energy yield and reducing costs
- Implemented IoT solutions for remote monitoring and predictive maintenance, leveraging data analytics to improve system uptime and performance
- Conducted site assessments, load profiling, and testing, including I-V curve tracing and thermal inspections
- Built wireless soil sensors, reducing water usage by 15% and increasing crop yield by 10%

Mechatronics Intern | Chirillex Electrical Pvt (Ltd) – (2022 – 2023)

- PV System Engineering: Designed commercial/residential solar PV systems; ensured code compliance
- Technical Execution: Site assessments, installation oversight, troubleshooting
- Procurement: Supplier negotiations; reduced costs
- Solar Irrigation: Engineered systems to optimize energy efficiency and crop yields
- Electrical Design & Commissioning: AutoCAD schematics; commissioned 50kVA transformer (high-voltage)
- Project Management: Full lifecycle oversight from budgeting to commissioning; safety and quality focus
