

ALLEN SIMBARASHE GUTA

IT Graduate Trainee | Field Support Engineer | Junior Cybersecurity

+263787424094 | allensimbarashe1@gmail.com | Harare | [linkedin.com/in/allen-simbarashe-guta](https://www.linkedin.com/in/allen-simbarashe-guta)

PROFESSIONAL SUMMARY

Motivated IT graduate (Upper Second Class, CUT) with hands-on experience in hardware troubleshooting, network fundamentals (TCP/IP, DNS, DHCP), and client-facing technical support. At OmniContact/Econet, resolved 90% of first-contact inquiries, including mobile data and network connectivity issues. Seeking the Graduate Trainee role at ZHD Consulting to apply and expand skills across Microsoft 365 administration and IP CCTV/access control systems in live client environments.

TECHNICAL SKILLS

- IT Support & Hardware: Windows 10/11, printers, routers, switches, Wi-Fi infrastructure, system maintenance
- Networking: TCP/IP, DNS, DHCP, network troubleshooting, performance analysis
- Cloud & Collaboration: Microsoft 365 fundamentals (user setup, mailboxes – ready to train further)
- Security: Firewall basics, endpoint protection, encryption, risk management
- Programming & Automation: Python (scripting for analysis & automation)
- Data & Reporting: Power BI, SQL (MySQL/PostgreSQL), report writing
- Certifications & Licenses: Code BE Driver's License (clean, available for client site travel)

PROFESSIONAL EXPERIENCE

OmniContact International / Econet Wireless Zimbabwe

Call Center Agent (Incident & Technical Support) — Nov 2024–Present

- Receive, verify, and log technical incidents in real time, maintaining accurate digital records, directly applicable to database event logging and audit trail management.
- Troubleshoot system issues and escalate complex technical challenges, mirroring the proactive identification of database performance anomalies.
- Coordinate with internal IT teams and external stakeholders to resolve data related issues, similar to cross-functional collaboration required in database administration.
- Operate under strict standard operating procedures (SOPs) and high-pressure conditions, demonstrating readiness for production database environments.

Deloitte Zimbabwe / World Food Programme (WFP)

Enumerator (Independent Contractor) — Jan 2024–Mar 2024

- Collected and verified field data using digital tools – equivalent to verifying surveillance alerts and confirming incidents.
- Conducted post-distribution monitoring to identify gaps – similar to security breach reporting and after-incident analysis.
- Prepared periodic and ad-hoc reports for programme managers – directly matches preparing incident and periodic reports in the job description.
- Ensured secure handling of sensitive beneficiary data – mirrors data protection and prevention of unauthorised access or disclosure.

FTG Global Corporation

IT Intern — Aug 2021–Aug 2022

- Monitored IT systems for anomalies and detected potential security breaches directly equivalent to monitoring surveillance systems for security incidents.
- Reduced system downtime by 15% through proactive troubleshooting demonstrates ability to ensure Command Centre equipment is functional.
- Conducted routine equipment checks and escalated complex system challenges matches troubleshooting system challenges for escalation.
- Documented technical processes and maintained secure logs of system access and repairs – relevant to maintaining registers and securely storing records.

EDUCATION

Bachelor of Science (Hons) in Information Technology

Chinhoyi University of Technology — 2019–2023

- GPA: 2.7 (Upper Second Division)

Advanced Level (A-Level)

Churchill Boys High School — 2017–2018

- Subjects: Computer Science, Mathematics

Ordinary Level (O-Level)

Herentals College — 2013–2016

- Core Passes: Mathematics, Science, English

PROJECTS

Minerals-Backed Cryptocurrency System (Blockchain)

- Developed a decentralized currency prototype using cryptographic techniques for secure peer-to-peer transactions.

FTG Stands Management System (Python)

- Automated tenant screening and accounting, reducing property processing time by 20%.

Tomato Farming Cost Analysis Tool (Python)

- Created a profit calculation system for farmers, factoring in climate and soil variables.

ADDITIONAL COMPETENCIES

- **Leadership & Collaboration:** Proven ability to work with cross-functional teams (IT, field operations, management) and coordinate with external stakeholders.
- **Analytical Mindset:** Strong problem-solving skills demonstrated through system troubleshooting, data discrepancy resolution, and project-based analytics.
- **Communication:** Excellent verbal and written English; experienced in preparing clear documentation, incident reports, and training materials.
- **Works Under Pressure:** Call centre and field data collection experience in high-volume, time-sensitive environments.
- **Adaptability:** Willing to adapt to changing priorities, shift work, and tight deadlines.

ACHIEVEMENTS

- Certificate of Recognition for Final Year Blockchain Project
- Improved IT system performance by 15% during internship at FTG Global
- Successfully handled sensitive beneficiary data for World Food Programme post-distribution monitoring

LANGUAGES

- English: Fluent
- Shona: Native
