Experience

- Chemplex Co-operation** January 2023 - May 2023
IT management trainee
Dynamics 365 Business Central user support
 - Fixed Asset Revaluation: Conducted fixed asset revaluation to ensure accurate financial reporting and effective asset management.
 - User Support and Account Management: Provided assistance in Active Directory, including password resets and user additions, enhancing security and access control.
 - Training and Development: Training of users on Dynamics 365 Business Central, empowering staff to utilize the system effectively for data-driven decision-making.
 - Process Optimization: Creating departmental structures and established purchase requisition processes within Dynamics 365, streamlining procurement workflows
 - Configured and optimized Outlook settings for users, enhancing email functionality and calendar management.
 - Answered calls and provided prompt assistance to users, resolving technical issues and inquiries effectively.
 - Performed Active Directory tasks, including user account creation, modifications, and permission management.
 - Added and configured user accounts in Sophos, ensuring robust endpoint security and compliance.
- Kadoma City Council** June 2021 - May 2022
IT support
Technical Support and Systems Management

Hardware Management:
 - Disassembled legacy systems and repurposed components (e.g., motherboards, graphic user cards) for integration into new setups to optimize computational resources.
 - Printer Management: Handled cartridge replacements and resolved printer jams to maintain operational efficiency within the organization.
Performance Optimization
 - System Enhancement: Identified underperforming computers and upgraded RAM to improve processing capabilities. Conducted routine cleaning of computers and printers to ensure optimal performance.
Software Management
 - Operating System Installation: Installed and upgraded operating systems from Windows 7 to Windows 10, ensuring compatibility with organizational software.
 - Software Installation: Deployed essential software packages, including Microsoft Office (2016, 2013, 2007) and Promun software, to facilitate employee productivity.
 - Antivirus Implementation: Installed and configured ESET antivirus software to safeguard organizational data.
Network Configuration

- Drive Mapping: Configured network drives to support a client-server architecture, enhancing file sharing and collaboration.
- Data Recovery: Utilized tools such as Disk Drill for recovery of lost data, ensuring minimal disruption to workflow.
- Email Configuration: Set up email accounts for seamless communication within and outside the organization.

Malware Management

- Malware Removal: Conducted manual and software-assisted removal of malicious programs to maintain system integrity.
- Backup Management: Performed daily and weekly backups from the Promun server to external hard drives, ensuring data security.

User Support

- Remote Assistance: Utilized remote desktop connections to assist users with server access and troubleshoot issues on the Promun server.
- Application Support: Provided guidance to users experiencing difficulties with Microsoft Excel and other applications.
- Network Connectivity: Assisted users in troubleshooting network visibility and internet connectivity issues.
- Outlook Configuration: Configured email accounts on Outlook for effective communication.

Education

- **Midlands State University** 2023
Bachelor of Commerce honors degree in information systems
2.1
