E-mail

ttinashec@gmail.com

Address

5115 Stoneridge Park Harare
Zimbabwe

Birth Date

25/Apr/2001

Languages

English, Shona

Skills

IT & Systems Administration

- Microsoft Office Suite (Word, Excel, PowerPoint)
- Exposure to IT infrastructure and system integration
- Daily reporting and documentation of technical operations

Electronic Security & Embedded Systems

- GSM/GPS vehicle tracking device design and implementation
- Sensor and actuator integration for monitoring and control systems
- Irrigation automation and piezoelectric energy generation

Summary

Recent Mechatronics Engineering graduate with hands-on experience in IT systems, embedded electronics, and workshop supervision. Skilled in microcontrollers, sensors, and actuators, with practical exposure to GSM/GPS tracking devices, automation projects, and electronic monitoring systems. Experienced in troubleshooting, reporting, and customer liaison through industrial roles. Known for adaptability, resilience, and fast learning, I am eager to expand my career in IT services and electronic security through ZHD Consulting's structured Graduate Trainee Program.

Education

Aug 2020 - June
2025

Chinhoyi University of Technology

Bachelor of Engineering (Honours) in Mechatronics

- Graduated with Upper Second Class (GPA 2.7).
- Specialized in automation, control systems, and CAD design and Industrial Management.
- Key projects: GSM/GPS-based vehicle tracker, piezoelectric energy generation research, automated tomato paste packaging machine.

Feb 2018 - Nov
2019

Serima High School

ZGCE Advanced Level

- Mathematics, Physics, Chemistry (grades C or better).
- Communication Skills pass.

Jan 2014 - Nov
2017

Serima High School

projects

- Familiarity with IPbased systems and electronic monitoring principles

Operations & Customer Liaison

- Team supervision, training, and workflow optimization
- Client relations and supplier coordination
- Strong communication skills in English and Shona

Safety & Compliance

- Enforcing workshop safety protocols and hazard reporting
- Knowledge of industrial safety standards and compliance requirements

Personal Attributes

- Fast learner with adaptability across IT and engineering domains
- Resilient, proactive, and resultsoriented
- Strong analytical and problemsolving skills

References

Available upon request

Awards

Headboy, Serima High School (2019)

Zimsec Ordinary Level

- 12 subjects passed with grade C or better, including Mathematics, English, Physical Science, Biology, Accounts, and Business Studies.

Jan 2016 - Nov 2017

Serima High School

National Foundation Certificate in Computer Operations & Packages

- Proficiency in Microsoft Word, Excel, Database, and Publisher.

Experience

Nov 2025 - April 2025

Renove8

Operations Engineer

- Supervised operators and technicians, enforcing safety and compliance standards.
- Conducted troubleshooting and maintenance on CNC machinery, compressors, and generators.
- Prepared daily operational reports and liaised with clients, strengthening communication and documentation skills.

October 2025 - Nov 2025

Renove8

Machine Operator

- Operated CNC machinery, gaining hands on mechanical experience in setup, calibration, and production output.
- Assisted in mechanical maintenance routines to minimize downtime and extend equipment life.
- Supported production schedules by aligning mechanical tasks with operational requirements.

June 2025 - October 2025

Prospect Lithium Mine (Ziquan)

General Hand

- Contributed to construction and mechanical installation work during power plant development.
- Assisted electricians and welders, gaining exposure to mechanical systems and industrial safety practices.
- Supported mechanical maintenance tasks, reinforcing adaptability in heavy industrial environments.

Oct 2023 - July
2024

CICOSY

Embedded Systems Development Intern

- Designed and implemented GSM/GPS vehicle tracking device for monitoring and security.
- Developed irrigation automation systems using sensors and microcontrollers.
- Conducted piezoelectric energy generation research, reinforcing electronics and scientific background.

Sept 2023 - Oct
2023

National Railways of Zimbabwe

Maintenance Technician Intern

- Performed maintenance and servicing on railway fleet, enhancing reliability and safety of train operations.

Feb 2020 - Oct
2020

Zimbabwe Beverage Merchandising Company

Merchandiser

- Increased product visibility and sales through effective merchandising strategies.
- Ensured efficient inventory management and strong relationships with store staff.

Projects

2023 - 2024

CICOSY

Vehicle Tracker Development

GSM/GPSbased system enabling realtime vehicle monitoring.

2023 - 2024

CUT & CICOSY

Piezoelectric Energy Generation Research

Innovated energy solutions using piezoelectric sensors.

2024 - 2025

Chinhoyi University of Technology

Automated Tomato Paste Packaging Machine

Led automation design for industrial packaging and filling system.
