

MARTIN T NYAMUKACHI

Graduate IT & Electronic Security Support Engineer

Stand #931 Hillview, Nyazura, Manicaland, Zimbabwe | martin.nyamscom@gmail.com | +263713200464

PROFESSIONAL SUMMARY

Results-driven IT and Electronic Systems professional with hands-on experience in infrastructure support, network maintenance, and electronic systems design. Proven expertise in both IT Services administration (Microsoft 365, system support) and Electronic Security systems (PABX, circuit repair, electronic infrastructure). Passionate about practical, real-world infrastructure work with strong problem-solving abilities and a commitment to continuous learning in hybrid technical environments.

CORE COMPETENCIES

IT Services & Administration

- Microsoft 365 Administration: User management, email systems, productivity applications
- IT Infrastructure Support: Hardware maintenance, OS administration (Windows 7-11, macOS), troubleshooting
- Desktop & Systems Support: PC maintenance, software deployment, system stability

Electronic Security & Systems

- Electronic Systems Design & Implementation: Circuit design, testing, and deployment for operational specifications
- Security Infrastructure: PABX systems maintenance, system reliability optimization
- Circuit Analysis & Repair: Troubleshooting, repair, and maintenance of complex electronic systems

Network Engineering & Cloud

- Network Configuration: Advanced LAN/WAN, OSPF, EIGRP, BGP, VLAN, VPN, SSH
- Cloud Infrastructure: AWS (Certified Cloud Practitioner) — security, services, best practices
- Protocol Expertise: TCP/IP, DNS, DHCP, NAT, secure remote access protocols

PROFESSIONAL EXPERIENCE

CHIEF TECHNICIAN

RosePhil Investments, Harare, Zimbabwe | April 2023 – June 2025

- Managed multi-departmental IT infrastructure, ensuring 99.9% uptime for critical business operations
- Provided hands-on IT support across desktop systems, servers, and enterprise applications
- Maintained internal connectivity, Microsoft Office Suite deployment, and system stability
- Diagnosed and resolved critical hardware/software issues with rapid root-cause analysis

TELECOMMUNICATIONS INTERN

Scientific Industry Research and Development Center (SIRDC) | Oct 2020 – Aug 2021

- Designed and deployed electronic systems to operational specifications, improving infrastructure efficiency
- Conducted advanced circuit troubleshooting and repair, significantly reducing system downtime
- Maintained PABX telephone systems and ensured high network availability across the organization
- Delivered desktop support, PC maintenance, and MS-software solutions enhancing staff productivity

EDUCATION & CERTIFICATIONS

Degree

Bachelor of Engineering (Honours) in Telecommunications Engineering

National University of Science & Technology (NUST) / TelOne Center for Learning | 2017–2022

Professional Certifications

Cisco Certified Network Associate (CCNA)

Valid: Aug 2024 – Aug 2027 | Specialization: Routing, Switching, Network Security

AWS Certified Cloud Practitioner (in progress) | AWS Cloud infrastructure, security, core services

KEY ACHIEVEMENTS

- Maintained 99.9% uptime for multi-departmental infrastructure at RosePhil Investments
- Led design and deployment of integrated electronic and network systems focused on scalability
- Advanced professional certifications (CCNA); actively building cloud expertise (AWS)
