The Hiring Manager

ZHD Consulting

Harare, Zimbabwe

Dear Hiring Manager,

Re: Application — Graduate Trainee, IT & Electronic Security Support Engineer

I am applying for the Graduate Trainee position at ZHD Consulting. Your programme description is honest about what makes it different — cross-discipline breadth, real infrastructure, and a company that hires graduates it intends to keep. That is precisely the kind of environment I am looking for, and I want to be equally direct: I bring strong IT foundations built in a genuinely demanding environment, the initiative to build working systems independently, and the attitude to learn electronic security from the ground up under structured mentorship.

On the IT services side, I have over two years of active experience at Parirenyatwa Group of Hospitals — administering Microsoft 365, managing LAN/WAN infrastructure, configuring firewalls and VPNs, maintaining hardware across Windows and Linux environments, and supporting a large multi-department user base around the clock. I am currently pursuing CompTIA Network+ to formalise and deepen that networking knowledge. Beyond support work, I independently built Offrez, a full-stack web and mobile platform, and a live KoboToolbox data collection system for Teach For Zimbabwe — both running in production today. The ability to build, deploy, and maintain systems is not something I am developing; it is something I already do.

I will be transparent about electronic security: IP CCTV commissioning and physical security systems are areas I have not yet worked in formally. That is exactly why this programme appeals to me — I am not looking for a role where I already know everything. What I bring to that learning curve is a strong networking and systems foundation, the ability to read and understand technical documentation quickly, and a track record of picking up new technical disciplines and applying them in live environments. An engineer who has administered hospital networks and self-built production software will not struggle to get comfortable with IP camera systems and access control infrastructure.

ZHD's 19-year reputation is built on solving problems others walk away from. I'd like the opportunity to show you I fit that culture. I am based in Harare, available immediately, and happy to discuss my application at your convenience. Thank you for your time.

Yours sincerely,

Mutsa Nyajeka

MUTSA NYAJEKA

Graduate Trainee — IT & Electronic Security Support Engineer

Harare, Zimbabwe | +263 787 228 099 | +263 713 729 111 | mutsanyajeka@gmail.com

PROFESSIONAL SUMMARY

Results-driven IT graduate with a BSc in Information Technology and over two years of hands-on systems administration, networking, and end-user support experience gained in one of Zimbabwe's most demanding ICT environments — a 1,000+ bed public hospital running 24/7. Technically grounded across Microsoft 365 administration, LAN/WAN infrastructure, network security, hardware maintenance, and full-stack software development. A self-starter who built a live platform (offrez.co.zw) and a working NGO data collection system from scratch — demonstrating the initiative and learning agility ZHD's graduate programme is designed for. Eager to expand into electronic security systems (IP CCTV, access control, alarm systems) under structured mentorship, and to grow into a well-rounded consultancy engineer over the 12-month programme and beyond.

TECHNICAL COMPETENCIES

- | | |
|---|---|
| <ul style="list-style-type: none">• Microsoft 365 — administration, SharePoint, OneDrive• LAN/WAN networking — configuration & maintenance• Firewalls, routers, switches & VPN administration• TCP/IP, DNS, DHCP & core networking protocols• Windows & Linux OS — installation, admin & patching• Hardware setup, maintenance & fault diagnosis | <ul style="list-style-type: none">• ERP systems support & database administration (MySQL)• IT helpdesk, incident logging & technical documentation• Full-stack development: Laravel, Node.js, PHP, JavaScript• Python scripting & task automation• Data collection systems: KoboToolbox, Power BI• Cybersecurity principles & data protection compliance |
|---|---|

PROFESSIONAL EXPERIENCE

ICT Support Officer | Parirenyatwa Group of Hospitals, Harare

2022 – Present (Intern → Full ICT Support Officer)

- Administer Microsoft 365 tenant services across hospital departments — managing user accounts, licences, SharePoint, OneDrive, and access permissions for a large multi-department organisation.
- Monitor and maintain LAN/WAN infrastructure including routers, switches, firewalls, and VPN configurations, ensuring secure and uninterrupted network connectivity across all hospital wings.
- Install, configure, and maintain hardware (desktops, laptops, printers, servers) and software across Windows and Linux environments — including OS installations, patching, and endpoint security.
- Administer and troubleshoot the TriMed ERP system: user onboarding, module faults, database queries, and coordinating vendor upgrades with minimal operational disruption.
- Log and manage all IT incidents through a structured ticketing system; escalate complex faults with full documentation; prepare daily system performance and incident reports for management.
- Provide on-call after-hours IT support — demonstrating the flexibility and composure required in a consultancy field environment where client issues don't follow business hours.
- Deliver end-user training sessions to improve staff adoption of digital tools and reduce repeat support incidents.

- Built and deployed a custom Helpdesk System (PHP/MySQL) that reduced incident resolution time by 40% and improved departmental efficiency by 10% — demonstrating initiative to solve problems beyond the job description.

PROJECTS

Offrez — Full-Stack Web & Mobile Platform (offrez.co.zw) | 2023 – Present

- Independently designed, built, and currently operates a live web and mobile platform — demonstrating the self-direction and technical depth ZHD's programme looks for in engineers it intends to retain.
- Stack: Laravel (PHP), Node.js, MySQL, JavaScript, HTML5/CSS; native mobile application.

KoboToolbox Data System — Teach For Zimbabwe | 2024 – Present

- Designed and manages a live digital data collection system for an NGO education programme — demonstrates ability to deploy and maintain systems in operational environments beyond the primary employer.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

CompTIA Network+ | Currently Studying

Actively building formal certification in networking fundamentals — TCP/IP, DNS, DHCP, VPNs, network security, and troubleshooting methodology.

EDUCATION

Bachelor of Science in Information Technology | Chinhoyi University of Technology | October 2024

Relevant Coursework: Networking, Cybersecurity, Database Management, Operating Systems, Software Development, Programming (Python, Java, C++), Data Structures & Algorithms

Advanced Level (2018): Pure Mathematics, Business Studies, Computer Science

Ordinary Level (2014): 10 passes including Mathematics and English
