

MALVIN MUNASHE HAPARIMWI

Software Developer

+263 781 154 761 • malvinhaparimwi@gmail.com • Harare, Zimbabwe • github.com/Malvinhaparimwi

PROFESSIONAL SUMMARY

Motivated Computer Engineering final-year student with 1+ year of hands-on software development experience, including full-stack web development and IT administration in a live financial services environment. Proficient in Python, JavaScript, and PHP with practical knowledge of MySQL databases and REST APIs. Demonstrated ability to design, build, and deploy real-world production applications independently. Eager to contribute to team-based projects while continuing to grow across backend, frontend, and enterprise systems.

TECHNICAL SKILLS

- Python, JavaScript, PHP
- HTML5, CSS3, REST APIs
- MySQL — database design & queries
- Git — version control & collaborative workflows
- Full-stack web development
- NLP & LLM fine-tuning (LoRA)
- Linux system administration
- ERP concepts (Odoo-style systems)

PROFESSIONAL EXPERIENCE

IT Attachee — Software Developer & IT Administrator | Empowerbank Pvt Ltd, Harare 2024 – 2025

- Designed, built, and deployed a full-stack web-based helpdesk system using PHP, JavaScript, and MySQL — significantly improving internal ticket handling and resolution efficiency.
- Architected ticket-tracking and workflow logic analogous to core ERP system principles, gaining direct exposure to enterprise application design.
- Maintained IT infrastructure and ensured high system uptime in a production financial services environment.
- Provided frontline user support, resolving software, hardware, and network issues under real operational pressure.
- Integrated backend database logic and REST API endpoints supporting internal business tools.

KEY PROJECTS

EB Helpdesk System — Lead Developer Jan 2025 – Jun 2025

- Built an end-to-end helpdesk solution for Empowerbank Pvt Ltd using PHP, JavaScript, and MySQL.
- Designed system architecture for ticket creation, assignment, tracking, and resolution — logic directly analogous to Odoo and similar ERP modules.
- Delivered a live production system actively used by staff across departments.

Customer Service Chatbot (AI) — Developer Aug 2024 – Jun 2025

- Applied Low-Rank Adaptation (LoRA) fine-tuning to Large Language Models to build a domain-specific customer support chatbot.
- Developed an automated customer service pipeline that improved user engagement and reduced response times.

Doctor Shona Diagnosis System — Developer Aug 2025 – Present

- Developing an NLP-based medical query interpretation system in the Shona language.
- Focused on language processing, accessible UI design, and localisation for underserved communities.

EDUCATION

Bachelor of Engineering in Computer Engineering

University of Zimbabwe | 2022 – Present (Final Year)

Relevant modules: Data Structures & Algorithms, Database Systems, Software Engineering, Computer Networks.

CORE STRENGTHS

- Strong problem-solving and systematic debugging approach with experience across full-stack environments.
- Proven track record deploying and maintaining production systems in high-stakes financial services contexts.
- Collaborative team player using Git workflows and version control best practices.
- Quick learner — able to rapidly adopt new frameworks and technologies (e.g. Odoo, LLM fine-tuning, NLP pipelines).
- Professional communication in English; native Shona speaker with strong community-focused development perspective.
